Mexique Cassina

Tables

One of Charlotte Perriand’s iconic “tables en forme libre,” Mexique’s design was further developed for the students’ rooms of the Maison du Mexique at the International University Campus in Paris (CIUP). With a compact frame and generous tabletop depth, Mexique can be easily moved and grouped to create a larger surface area or add interest using different heights, finishes, and colors. Two collaborative variations allow guests to pull up a chair or Mexique stool to interact.

Features

- Classic free-form design with wood top in a variety of finishes and colors
- Essential three-leg base with metal legs
- Three sizes of occasional tables suit a variety of settings
- Use alone or group together to create a layered landscape of surfaces
- Collaborative tables—low and high—are ideal for use with Mexique stools

Certifications

- Meets ANSI/BIFMA X5.5 Standard for Desk and Table Products
